Web Development Task 4

Task Description:

Develop a landing page for a community website using HTML and CSS. The landing page should include a navigation menu, a banner image or video, and sections for featured content, recent updates, and upcoming events. The page should be designed to be visually appealing, easy to navigate, and responsive to different screen sizes. The use of CSS styling and layout techniques should be used to create a consistent visual style throughout the page. Additionally, the landing page should be optimized for search engines and have a clear call to action to encourage visitors to explore the rest of the website.. After completing the task, you need to copy the code and convert it into a PDF file and take screenshots of the output.
